## Projects

### URL Shortener

Is a full stack application that enables users to shorten their URLs as well as group them by categories. In this project I focused on learning more about clean architecture and implemented the reads and writes to the database using the MediatR pattern.

C# .NET Core API Vue.js SQL Server MediatR

### Expenses Tracker API

Is a simple API that enables users to register and log in to their accounts and track their expenses and spendings. Authentication and authorization is implemented with JWT.

C# .NET Core API JWT SQL Server

## Education

### Bachelor's degree in Computer Science

*Faculty Of Sciences, University Of Novi Sad (2019-)*

## Experience

### Levi9 Winter Workshop (Internship)

*February 2022 - March 2022*

Internship was divided into few parts. The first part was focused on Git version control, then we worked on relational database modeling and made a database model for a delivery app, and practiced making database queries. On the last week we worked on .NET Core and Azure Cloud services.

## Skills

**C#, Java, SQL, .NET Core, Vue.js, HTML, CSS**

## Languages

**Serbian, Slovak, English**
